New Project, Severin Sea Lodge in Mombasa, Kenya

Aschoff Solar finished a new ST project, for the *Severin Sea Lodge* in Mombasa.

The System is designed for the support of the existing hot water System, to supply staff and guests of the Lodge reliably by the power of the sun.

The *Severin Sea Lodge*, built in traditional African style, was inaugurated in 1972 as subsidiary of the German group of companies "Severin Elektrogeräte" and offers its guests several bungalows and swimming pools in an ample palm tree garden, close to the Bamburi Beach at the Indian Ocean.

The project was realised in cooperation with Bosch Thermal Technology, using high-quality vacuum tube collectors, supplemented with other quality goods of the Bosch/Buderus product line.

Project Data

Customer: Severin Sea Lodge
Location: Mombasa, Kenya
Collector Area: 343 m²
Collectors: Bosch Vacuum Tube Collector SKR21.1
