

Aschoff Solar GmbH

**Solar Energy
for industrial applications
- easy, efficient and economic -**

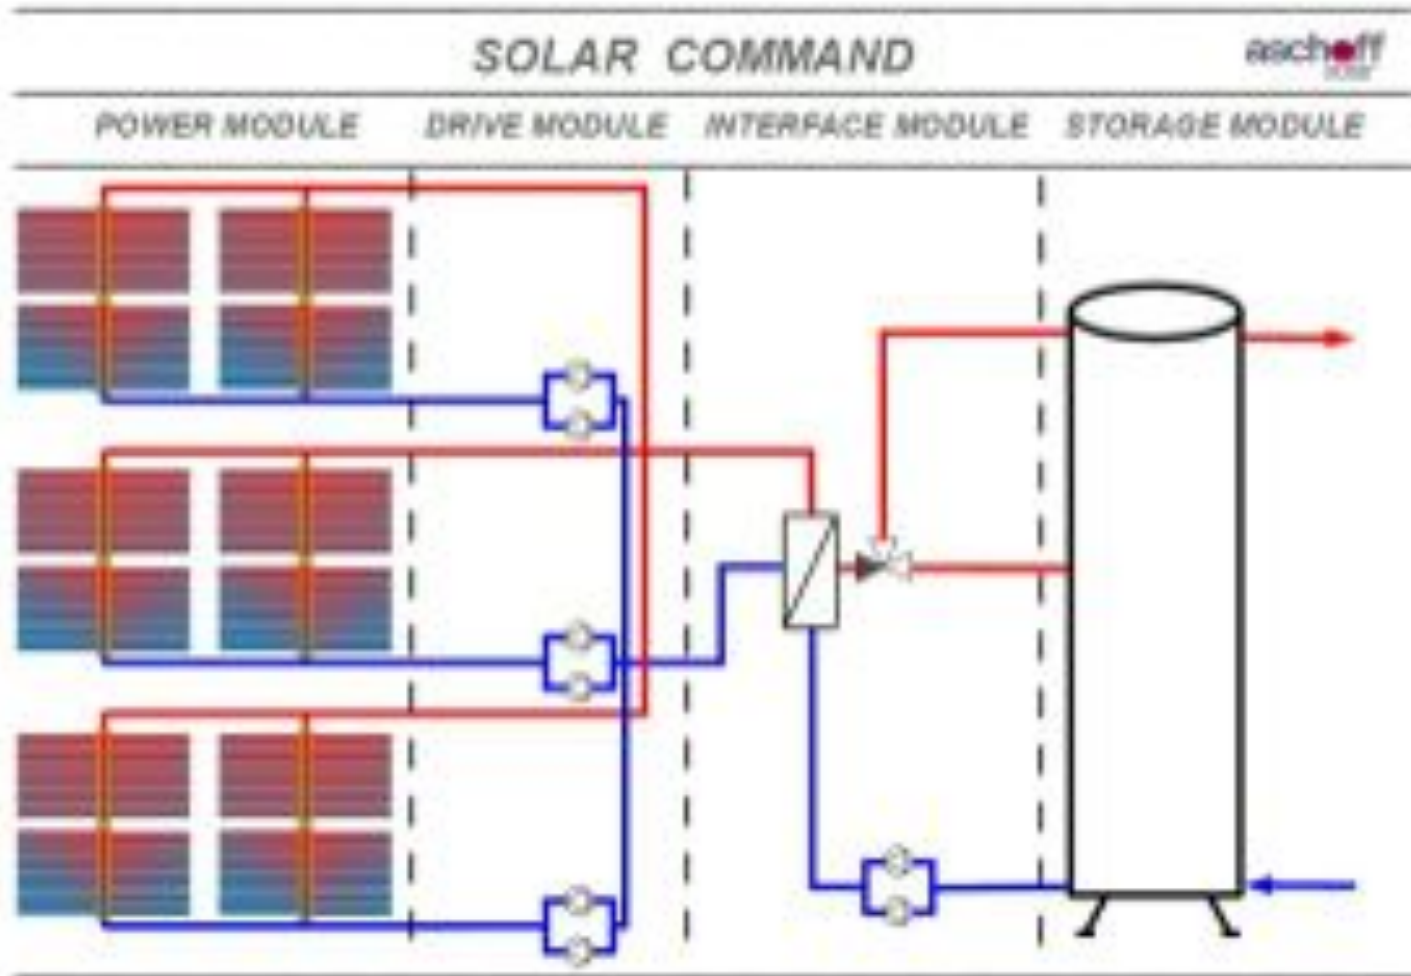

Solar Systems for Industries

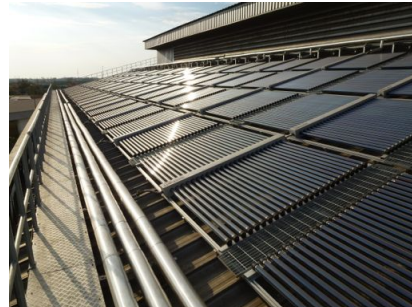

Sustainable and economic hot water solution for tanneries, textile industries, slaughterhouses, breweries, dyeing processes, food processing and a lot more

Aschoff Solar Thermal Systems

Aschoff Solar Thermal Systems

System Applications:

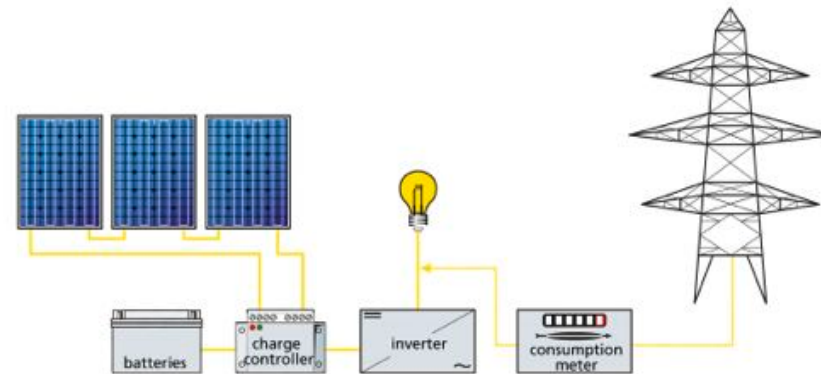

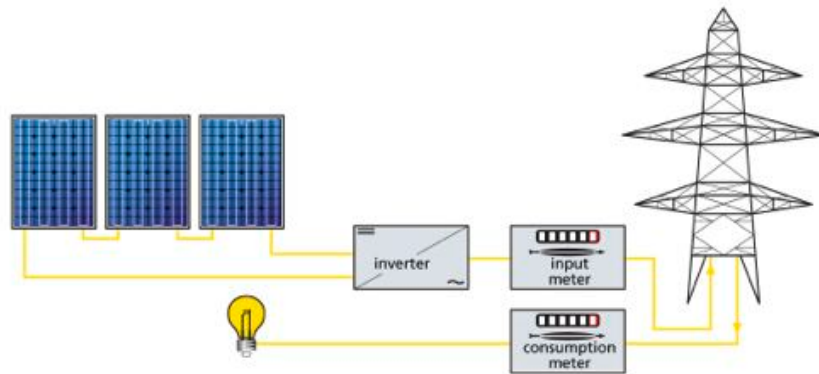

- Boiler Preheating
- Support of closed circuits (dryers, bottle washing)
- Pool heating (dip pool coating, galvanic industries)
- Direct heating of water for the process (washing, tanning, dyeing)

Solar Power for Industries

Use the free solar power, to become independent and to generate your own, emission free electricity

Aschoff Solar Power Systems

Fuel Saving Solutions

Grid-connected for self-consumption or feeding in
- easy and cost-efficient
System can be changed into battery system in the future

Solar Back-Up Systems

Totally independent solutions with batteries for the small and medium size applications

Aschoff Solar Power Systems

System Applications:

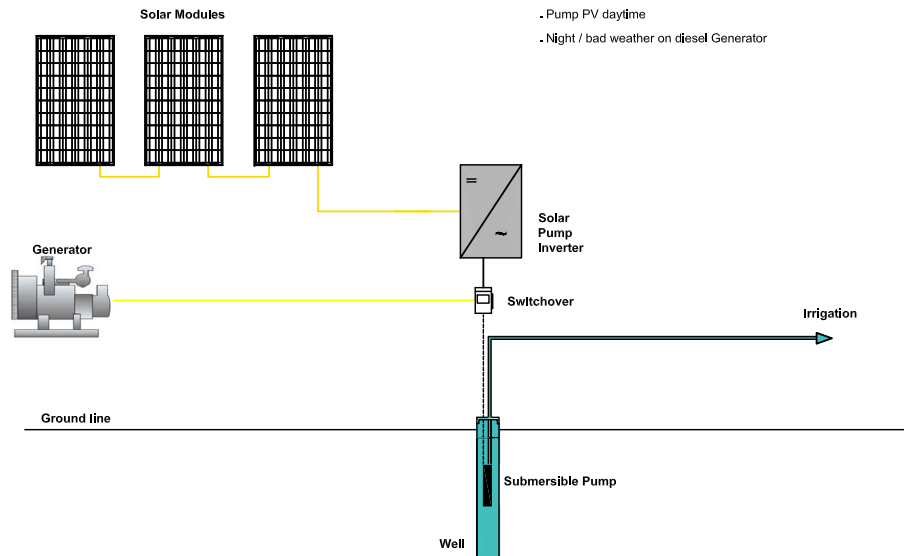

- Feed in systems to supply electricity to the public grid
- Fuel saver solutions for self-consumption of electricity
- Car Port solutions with charging stations for e-vehicles
- Solar Backup Systems for villas and housing to ensure power supply in case of blackouts

Aschoff Solar Pump Systems

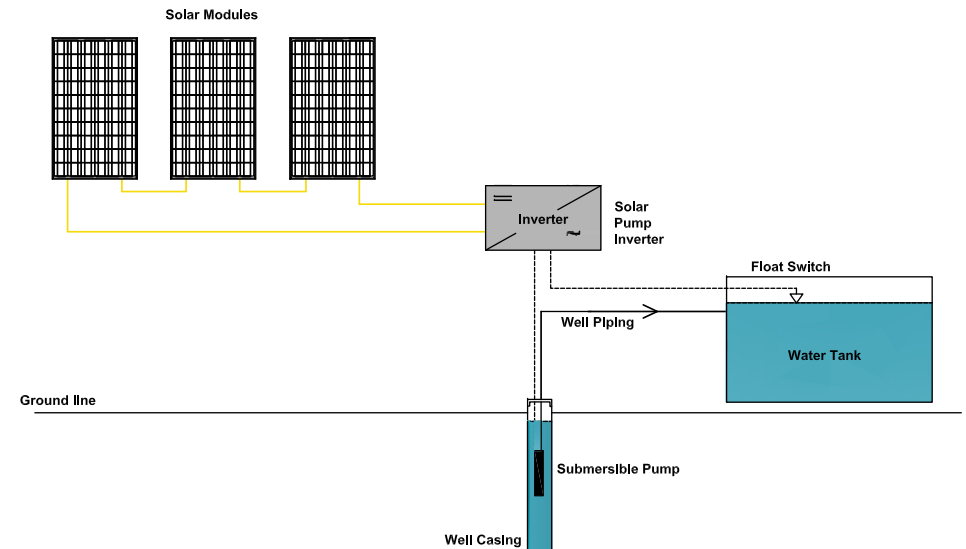

Sustainable and economic water pump solution for irrigation, livestock and fish farming, for water supply and a lot more ...

Aschoff Solar Pump Systems

Direct irrigation from the well during daytime
with or without hybrid operation in combination with generators or public grid

Stand-alone irrigation with water storage
For small and medium size applications in combination with water storage on the ground or high level water tanks

Aschoff Solar Pump Systems

System Applications:

- Fresh-water supply
- Irrigation
- Groundwater lowering
- Fountain applications
- Mining applications
- Larger scale village or communal water supplies
