

## Aschoff Solar Company News

November 2017

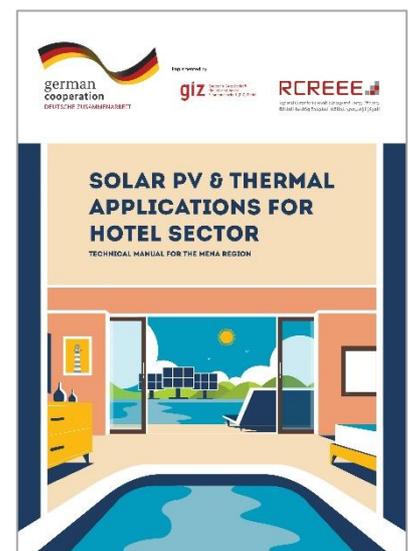

### New Solar Brochure

Together with the GIZ and in cooperation with the Regional Center for Renewable Energy and Energy Efficiency (RCREEE), Aschoff Solar established a new solar brochure.

Under the topic “Solar PV & Thermal Applications for the Hotel Sector”, the implementation of solar Systems for hotels is described in detail on nearly 200 pages.

Though the focus is considerably on the MENA region, hence Middle East and North Africa, the feasibility of the solar applications can be assigned to any hotels in proper climate locations, such as the tropics or in deserts.
