

Aschoff Solar Company News

April 2015

New Product, Solar Pump Systems

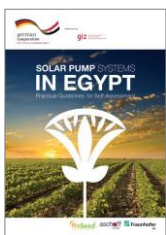

Aschoff Solar is glad to announce a new product in its scope of solar solutions.

The *Solar Pump Systems* are the sustainable and economic water pump solution for irrigation, livestock and fish farming, for water supply and a lot more.

The *Solar Pump System* Technology is depending on the local solar conditions of irradiation and requires an inverter technology, which takes the special conditions of pumping and demand profiles into account.

On the occasion of the new product, Aschoff Solar and the GIZ designed a widespread brochure in cooperation that can be downloaded under following link:
