May 2017

New Project, Deutsches Haus, Office Building in Ho Chi Minh City, Vietnam

Aschoff Solar and Terramar Vietnam finished a new Solar Power System, for *Deutsches Haus* in Ho Chi Minh City.

The System is designed to generate electricity for self consumption and contributes its part to the ecological concept of the building.

This was already honoured as “best ecological construction project” with the *South East Asian Property Award 2016*.

Deutsches Haus is the lighthouse project of Germany in Vietnam and for the ASEAN region and symbol of the strategic partnership and friendship between Germany and Vietnam.

The building was planned and constructed under conditions state-of-the-art and enjoys an exemplary reputation as showcase project with the Vietnamese LEED certification. Under the patronage of the Federal President of Germany, Frank-Walter Steinmeier, *Deutsches Haus* will offer after its completion within the third quarter of 2017, office facilities for a plenty of German companies.

The Solar Power System indeed may not be the biggest one in Vietnam in reference to its capacity, but for sure one of the highest, with an exposed location in the heart of Ho Chi Minh City.

Project Data

Customer:	Deutsches Haus
Location:	Ho Chi Minh City, Vietnam
Solar Power:	55 kWp
Solar Yield:	75,000 kWh/year
