New Project, National Assembly House in Hanoi, Vietnam

Aschoff Solar started the installation of the Solar Power System for the *National Assembly House* in Hanoi.

The System is designed to generate electricity for self consumption in this government building.

gmp from Germany was responsible for the architectural design. The engineering was under the leadership of IFE Eriksen, a German engineering company.

The *National Assembly House* is the new parliament of Vietnam and is located in Hanoi. In 2008, the old conference building has been demolished, to construct a new one.

A circle of thin film photovoltaic modules will surround the national flag of Vietnam, on the roof of the new building.

Project Data

Customer: National Assembly House
Location: Hanoi, Vietnam
Solar Power: 49.98 kW
