

Aschoff Solar Company News

February 2013

New Project, World Cat, Sports Manufacturer in Ho Chi Minh City, Vietnam

Aschoff Solar and Terramar finished their first PV project, for *World Cat Vietnam*, better known as *Puma*.

Team Vietnam from partner Terramar installed the System in just one week with support of two German experts.

The project comprised the installation of a Car Port System in the so called "Puma Village", close located to Ho Chi Minh City.

The System itself is designed for self consumption of the generated power. The Car Port was designed by the German Korn-Architects, located in Ho Chi Minh City and gives a perfect support to the PV System.

Puma is a global active player and one of the largest sports wear manufacturers. In 1948, Mr. Rudold Dassler founded the company in Germany.

Amongst others, *Puma* provides several local and international football teams with clothes and is outfitter of numerous Olympic teams since 2008 in Beijing.

Based on *Puma* reference, Aschoff Solar can even offer complete Car Port Solutions in Southeast Asia now.

Project Data

Customer: World Cat Vietnam
Location: Ho Chi Minh City, Vietnam
Solar Power: 43 kW
Solar Yield: 60,000 kWh/year estimated
