

Aschoff Solar Company News

June 2016

New Project, RWE, Energy Provider in Monheim, Germany

Aschoff Solar finished a new ST project, for *RWE* in Monheim.

The System is designed for the connection to the existing district heating, supplying private households in the region close-by.

RWE is the second largest enterprise of energy supply in Germany and additionally substituted in other European countries like the Netherlands, Great Britain etc.

The project was realised in cooperation with Bosch Thermal Technology, using high-quality flat plate collectors, supplemented with other quality goods of the Bosch/Buderus product line.

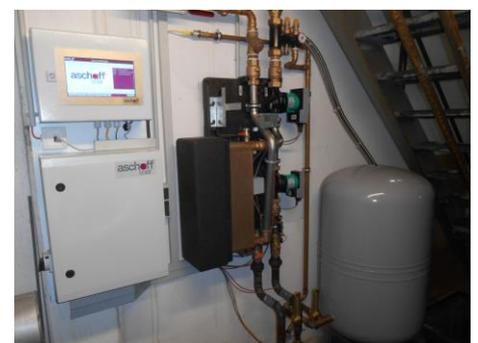

Project Data

Customer: RWE Energiedienstleistungen GmbH
Location: Monheim, Germany
Collector Area: 180 m²
Collectors: Bosch Flat Plate Collector FT226-2H
Support Structure: Schletter

in cooperation with

BOSCH
