Solar Water Heaters for a Hospital in Yemen

Aschoff Solar delivered Solar Water Heaters for the *Al-Thawra General Hospital* in Yemen within the scope of a fundraising campaign.

The Solar Water Heaters ensure the reliable supply of hot water, which is indispensable for every hospital.

In cooperation with the "Hammer Forum", a German aid agency with the focus on medical provision of children in conflict areas, an expert installed the Solar Water Heaters together with the local staff.

We are proud of joining this campaign and glad to have contributed our part to help people in need.
